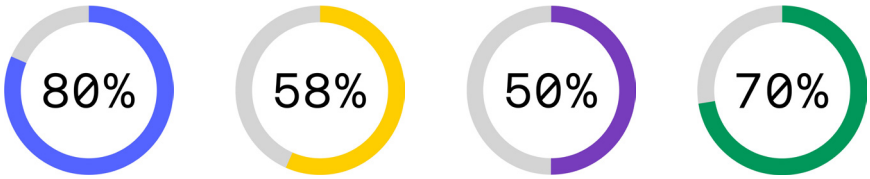
OneStream® CPM Express

World-Class Financial Management Without the Headaches

OneStream CPM Express brings financial planning, reporting, and close best-practices of the world's top-performing organizations and unifies them into one simple solution that can be deployed in weeks, all at a predictable cost.



Faster deployment within 6–8 weeks

Improvement in planning cycles

Reduction in time to close your books

Reduction in data management cycles

Capabilities

- **Financial Management Success. Faster Than Ever:** CPM Express packages decades of experience and best-practices into a rapid-deployment (6–8 weeks). It's quick to configure, providing predictable cost and time to value.
- **Integrate with the Business Systems You Use Most:** Built-in, click-to-configure data-quality and pre-defined load template formats to connect to the business systems you use most. Automate the integration of your trial balance and data sources — **once**, ensuring data quality and trust.
- **Streamline Financial Planning, Forecasting, and Close:** CPM Express brings actuals and plans together so you can optimize close, planning, compliance, and reporting processes. Ensuring completeness, timeliness, and trust in your financials.
- **Deliver Self-Service Reporting and Analysis:** With guided reporting, predefined Income Statement, Balance Sheet and Cashflow report templates, and built-in analytics, you can report and analyze financials at any level, with confidence.
- **Scale with Your Growing Needs:** Because CPM Express is built on OneStream's uniquely unified platform, you can easily extend to automate and improve other financial processes as the needs of your organization grow — all on the same data-model, without adding technical debt.

Leading Beauty Manufacturer
A leading beauty manufacturer chose OneStream's CPM Express. To drive transformation in just eight weeks.

By the end of the first week, the design and core processes were laid down, followed quickly by the integration of seven years of the client's historical data. By the fifth day, data reconciliation processes were underway. The data was fully integrated and largely reconciled, leaving the CFO exceedingly satisfied with the outcome.
